Jacob A. Terren

Full Stack Application Developer

Woburn, MA • jterren@gmail.com • linkedin.com/in/jacob-terren

PROFESSIONAL SUMMARY

Full Stack Application Developer with 7 years of IT experience, including 4+ years designing, building, and supporting enterprise applications across retail, fintech, and manufacturing environments. Strong background in TypeScript, React, Node.js, Azure, Microsoft SQL Server, REST APIs, CI/CD, and database design. Experienced with vendor integrations, cloud deployments, compliance-focused systems, and scalable applications used across large multi-site organizations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java, C#

Frontend: React, Material UI, ElectronJS, HTML, CSS

Backend: Node.js, Express.js, Azure Functions, REST APIs, Microservices

Cloud: Microsoft Azure, Azure Functions, App Service, Azure SQL Database, Key Vault, VMs, VNets, IAM, Azure DevOps, CI/CD, Docker

Databases: Microsoft SQL Server, Relational Database Design, Query Optimization, Performance Tuning

Data & Reporting: ETL Pipelines, Structured and Unstructured Data, Power BI

Security & Compliance: PCI Compliance, CMMC Support, Fraud Prevention, IPSec VPNs

Tools: Git, Postman, Confluence, Smartsheet

Systems: ERP Systems, Linux, Windows

PROFESSIONAL EXPERIENCE

The Entwistle Company — Database Administrator | 2025 – Present

- Administer, monitor, and optimize ERP database systems supporting 100+ users across manufacturing, operations, and business functions.
- Perform database performance tuning, troubleshooting, validation, and production support to improve reliability and data integrity.
- Support CMMC and PCI compliance initiatives across database, infrastructure, and operational systems.
- Develop real-time production dashboards using SQL and ERP data to improve operational visibility, reporting accuracy, and manufacturing decision-making.
- Contribute to technology modernization initiatives by improving ERP accessibility, mobile computing workflows, and infrastructure readiness across manufacturing environments.

EG America — Full Stack Application Developer I & II | 2021 – 2024

- Provided technical direction for PCI-compliant SmartRewards mobile order payment expansion supporting app-based payment, mobile wallet, and loyalty workflows across EG America's 1,500+ location retail network.
- Co-architected the Chase Merchant Services API integration and supporting Microsoft SQL Server data model; contributed to implementation alongside ResultStack developers.
- Designed Forter anti-fraud integration workflows for payment screening, risk mitigation, and operational review requirements.
- Engineered Azure infrastructure, IPSec VPN connectivity, and Azure DevOps pipelines for enterprise applications in multi-environment deployments.
- Built TypeScript APIs, SQL Server database objects, stored procedures, ETL pipelines, and data ingestion processes supporting payment, loyalty, CRM, reporting, and internal business applications.

- Developed frontend features using TypeScript, React, and Material UI, including a SmartRewards mobile wallet micro-frontend for adding credit and debit cards to support app-based payment enrollment.
- Engineered a large-scale ElectronJS application using React, Node.js, and Microsoft SQL Server for deployment across 1,500+ retail locations.
- Provided on-call production support, troubleshooting, and root cause analysis for critical payment, retail, and internal systems.

EG America — Knowledge Coordinator | 2020 – 2021

- Led Store Support knowledge migration from OneNote to Confluence, improving documentation structure, searchability, and accessibility across teams.
- Maintained a centralized knowledge base of 800+ documents supporting IT operations, support workflows, and internal processes.
- Designed knowledge management workflows using Smartsheet and supported enterprise password management rollout.

Cumberland Farms / EG America — IT Support Technician | 2019 – 2020

- Supported IT systems across 1,000+ retail locations, troubleshooting hardware, software, networking, point-of-sale, and store technology issues.
- Coordinated large-scale store technology migration calls with 30+ technicians and stakeholders during Cumberland Farms' transition into EG America.
- Created internal documentation, troubleshooting guides, and knowledge articles to improve support efficiency, escalation quality, and team consistency.

EDUCATION

Framingham State University | 2020

Bachelor of Science in Computer Science
